05 March 2010

For immediate release

Waterman Wins Major UTS Project

Waterman Sydney has been appointed as Mechanical, Electrical and ESD engineering consultants for the new University of Technology, Sydney (UTS) Broadway Building.

As an integral component of the UTS City Campus 2020 Master Plan, the uniquely clad Broadway Building is to be designed by Melbourne architect Denton Corker Marshall. The Broadway Building will be approximately 42,000sqm over 15 levels and will house the UTS Faculty of Engineering and Information Technology.

The building will target a 5-Star Green Star rating and the energy saving strategy is to deliver a 30% - 45% energy saving over benchmark tertiary educational buildings with similar functional spaces.

Waterman Sydney Chairman, John North commented "Waterman is delighted to have been awarded this project and we look forward to working with the UTS Project Team to develop and deliver this world class, sustainable building." The building is due for completion in June 2013.
