

Waterman AHW
Consultant Engineers

Food Manufacturing Facilities Engineered for Now & The Future ... Aren't they?

As technology and equipment evolve, so will the requirements of your food manufacturing facility and its support systems. To ensure maximum operating efficiencies Waterman AHW can help you expand and modify your existing facilities or establish a new facility.

Waterman AHW has over 30 years design and project management experience in optimising production methods, engineering process systems and designing buildings resulting in efficient, functional and cost-effective food manufacturing facilities. Waterman AHW offers a comprehensive range of services from initial concept through to completion including -

- strategic planning
- feasibility studies
- process simulation
- site selection
- process engineering
- equipment selection
- plant layout & design
- project management
- simulation & optimisation of operations

Speak to us today to make sure your facility will handle your operating needs now and in the future.
